Série comercial	Série ROLLER 330
Descrição sintética	DISCO 1 TOMADA INDUSTRIAL

**Descrição**

The ROLLER 330 Series introduces a robust solution with the 1 ind. socket holder disc, designed for efficient power distribution in demanding environments. This product is engineered for surface mounting, ensuring stability and ease of installation. Constructed with high-quality materials, it offers durability and resilience in various industrial settings. The socket holder disc is compatible with a range of electrical systems, providing versatility and adaptability. Its design facilitates seamless integration into existing setups, enhancing operational efficiency. This component is ideal for professionals seeking reliable and long-lasting electrical solutions, ensuring optimal performance and safety in complex applications.
