### General Information

Global Commercial Alias	ACS880-07-0470A-7
Product ID	3AUA0000154956
ABB Type Designation	ACS880-07-0470A-7
Catalog Description	ACS880-07-0470A-7 PN: 450 kW, IN: 470 A

**Long Description**

The cabinet-built single drives are built to order, meeting your needs regardless of the technical challenges. The drive configuration includes a rectifier, DC link, inverter, fuses, line choke and a main switch, all built into a compact cabinet for easy assembly and commissioning. The ACS880-07 offers a wide variety of standardized configurations for different application requirements, from line contactors, to preventing unexpected motor starts. If the application requires more, ABB's Order-Based Engineering services can add special features to the standard product, such as an additional cabinet for customer-specific devices.

Drives up to frame size R11 are based on a compact single module including rectifier and inverter. Larger drives consist of separate rectifier and inverter modules, providing redundancy with parallel connected units.

If one module needs to be disconnected, the drive can continue running at reduced power. The robust design and enclosures up to IP54 make the ACS880-07 suitable for even very harsh environments.
