■ CARACTERÍSTICAS GERAIS

Série comercial	Série ROLLER 450
Descrição sintética	TAMBOR ENROLADOR

Descrição

The ROLLER 450 Series Drum for Generic Use is designed for versatile applications, offering robust protection and portability. Constructed from engineering plastic, it provides exceptional durability and impact resistance with an IK08 protection rating. The IP55 protection degree ensures comprehensive protection against dust and moisture, making it suitable for demanding environments. This drum is equipped with a convenient carrying handle, enhancing mobility and ease of transport. Ideal for professionals seeking a reliable and resilient solution, the ROLLER 450 Series combines functionality with robust construction to meet diverse operational needs.
