SIEMENS

Data sheet 6GT2821-5AC10

product type designation

RF250R reader

SIMATIC RF200 Reader RF250R with RS422 interface (3964R) without antenna IP65, -25 to +70 °C, 50x 50x 30 mm, can be operated with: ANT 1, 3, 3NO, 8, 12, 18, 30.

suitability for operation	ISO 15693 Transponder (MDS Dxxx), for connecting to communication modules		
radio frequencies			
operating frequency / rated value	13.56 MHz		
range / maximum	60 mm; Range is dependent on transponder type: observe http://support.automation.siemens.com/WW/view/en/67384964		
protocol / with radio transmission	ISO 15693, ISO 18000-3		
transfer rate / with radio transmission / maximum	26.5 kbit/s		
product feature / multitag-capable	No		
electrical data			
transfer rate / at the point-to-point connection / serial / maximum	115.2 kbit/s		
transmission time / for user data			
• for write access / per byte / typical	0.6 ms		
for read access / per byte / typical	0.6 ms		
interfaces			
number of external antennas	1		
standard for interfaces / for communication	RS422		
type of electrical connection			
for external antenna(s)	M8, 4-pin		
• for communications interface	M12, 8-pin		
mechanical data			
material	PA6.6		
color	anthracite		
tightening torque / of the screw for securing the equipment / maximum	1.5 N·m		
mounting distance / relating to metal surfaces / recommended / minimum	0 mm		
supply voltage, current consumption, power loss			
supply voltage / at DC			
rated value	24 V		
•	20.4 28.8 V		
consumed current / at DC			
• at 24 V / typical	0.05 A		
ambient conditions			
ambient temperature			
during operation	-20 +70 °C		
during storage	-25 +80 °C		
during transport	-25 +80 °C		
protection class IP	IP65		

Approvals / Certificates General Product Approval		(V4.7)	Radio Equipment Type Approval Certi-	
Approvals / Certificates		(V4.7)		
Annuacyala / Cartificato		(V4.7)		
security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
