Efficiency class IE2

Comparison with the reference converter (90% / 100%) 45.1 %

The percentage values show the losses in relation to the rated apparent power of the converter.

The diagram shows the losses for the points (as per standard IEC61800-9-2) of the relative torque generating current ( $I$ ) over the relative motor stator frequency ( $f$ ). The values are valid for the basic version of the converter without options/components.
