Descrição

The 4 Ind. Socket Holder Disc from the ROLLER 450 Series is designed for efficient power distribution in industrial settings. This robust socket holder accommodates four industrial sockets, ensuring reliable connectivity for various equipment. Engineered for durability, it is suitable for demanding environments where consistent power supply is crucial. The design facilitates easy installation and maintenance, optimizing operational efficiency. With its sturdy construction, the socket holder disc is built to withstand the rigors of industrial use, providing a dependable solution for professionals seeking a high-performance power distribution system.
